Erasmus+

To whom it may concern,

on behalf of the whole Erasmus+ Team we would like to thank you for your outstanding work concerning the organization of the Lab Workshop at Niels- Stensen- Gymnasium in the last 10 days. We were provided with the best facilities and equipment so that our students could work very efficiently and learn a lot not only about chemistry but also about cooperation, mutual understanding and international friendship. After participating in many workshops all over Europe, we can say that the labs in the Niels- Stensen- Gymnasium in Harburg are among the most modern and excellent laboratories suitable for all kinds of experiments. Students educated in this school have proved their high skills and knowledge throughout the project.

But the best equipment is worthless without helpful and experienced teachers and students. The commitment and enthusiasm we experienced here in your school is highly appreciated by all project participants. We all know that the contacts between catholic schools triggered the European educational cooperation between different countries. This educational network has achieved best practice awards issued by the EU and has contributed to fruitful discussions and cooperations between the participating countries. This helped many students to start a career in science and to support the European idea.

Considering all these facts, we were sad and disappointed to learn about the plans of closing such a successful educational institution. To find a partner institution of this high quality will be a big challenge and threatens the success of future projects.

We are writing this letter with the intention of expressing our gratitude towards the community of the Niels- Stensen- Gymnasium for the cooperation in the last 15 years.

Also we would like to ask people with the power to influence the future of the school to reconsider their decision and keep in mind all the outstanding results the school has achieved.

With our signatures below we want to show our sympathy and support for all members of the Niels- Stensen- Gymnasium.
